

DIGITSPOT SOLUTIONSLIMITED

The Company

Digspot Solutions Limited; we are innovative, reliable and efficient and we have been demonstrating this since 2011.

We provide one-stop innovative info—tech solutions across all verticals. Depending on the size and field of your organization, we have different products and services to meet your requirements. We are Value Added Reseller to provide the optimum and customized solutions made for your organization

Our product portfolio provides cutting-edge solutions from the network edge to the data center, ISP Radio. It addresses key areas such as cybersecurity in On-premise, Hybrid cloud, data center, infrastructure, networking integration, SD-WAN solutions, network management, application performance application delivery networking, load balancing, Data-Ops management, data management, Backup & recovery solutions, Data Science, IoT & DevOps, and ICT Consultancy.

VISION

To be recognized and admired by our employees, customers, and partners as being the best ICT company to be associated with in the future

MISSION

To be one of the leading ICT companies assisting and enabling customers to do excellent work by adding value and exceeding expectations

We believe in

Motivation

Collective responsibility and leadership Professionalism and ethics

Adding value to our client' needs

Company's Key Values for Development

Desire for Excellence

Trust and confidence build up

Innovation

Information Security

Information theft is the most expensive and fastest-growing segment of cybercrime. Largely driven by the increasing exposure of identity information to the web via remote work, internet services and cloud services. But it is not the only target. Industrial controls that manage power grids and other infrastructure can be disrupted or destroyed. And identity theft is not the only goal, cyberattacks may aim to compromise data integrity (destroy or change data) to breed distrust in an organization. Digitspot Solutions Limited is here to support you and provide the line of security you need to protect and secure your data and infrastructure unauthorized access that could lead to denial of service or cost your organization money.

Digitspot is partnering with the market leader in unified threat management, delivering purpose-built solutions that improve performance, increase protection, and reduce costs. It secures customers' networks worldwide, including most of the Fortune Global 500 companies

SentinelOne is the only cybersecurity solution encompassing AI-powered prevention, detection, response and hunting across endpoints, containers, cloud workloads, and IoT devices in a single autonomous platform. With SentinelOne organizations gain full transparency into everything happening across the network at machine speed – to defeat every attack, at every stage of the threat lifecycle.

Tenable®, Inc. is a Cyber Exposure company. Over 30,000 organizations around the globe rely on Tenable to understand and reduce cyber risk. With Tenable, you can: Identify your weaknesses, Gain a comprehensive understanding of cyber risk, reveal the truth about critical gaps across all assets and attack pathways.

Imperva provides a comprehensive suite of application security, data security, and identity and access management technologies that secure what matters most. Imperva provides solutions to enable businesses to operate securely and innovate in the cloud by lowering complexity and risk across cloud and on-premises systems..

Sophos UTM provides the ultimate network security package with everything the customer needs in a single modular appliance. It simplifies your IT security without the complexity of multiple point solutions. The intuitive interface will help you quickly create policies to control security risks. And clear, detailed reports will give you the insight you need to improve your network performance and protection.

With the increasing number of API treats, Noname Security protects APIs in real-time and detects vulnerabilities and misconfigurations before they are exploited. Noname is an out-of-band solution that doesn't require agents or network modifications, and offers deeper visibility and security than API gateways, load balancers, and WAFs.,

Information Security

vmware® Carbon Black

The VMware Carbon Black cloud consolidates endpoint protection and IT operations into an endpoint protection platform (EPP) that prevents advanced threats, provides actionable insight, and enables businesses of all sizes to simplify operations.

Delivers the highest level of protection to mitigate data breach and compliance risks. With our industry-leading technology, you get comprehensive discovery, monitoring, and protection capabilities that provide total visibility and control over your information everywhere it goes.

Burp Suite

Burp Suite, a versatile web security testing tool, empowers security professionals to identify and exploit vulnerabilities in web applications. This comprehensive suite offers a range of tools for both manual and automated testing, including intercepting and modifying HTTP traffic, scanning for vulnerabilities, and analyzing application behavior.

Netgate provides open-source, secure networking solutions for enterprises and home users, specializing in firewall, VPN, and router solutions. They are known for their pfSense software, which offers extensive networking features for firewall and security management. Netgate's services support cloud connectivity, VPN access, and performance optimization, catering to a wide range of IT needs.

The company develops and markets internet and computer content security and threat management solutions. Its product portfolio includes security software, network, and web security, mobile device security, and anti-spam products.

Best-in-breed security solutions for all apps, users, and devices on-premises and in the cloud.

Network Solutions

With the growth of companies leading to widespread geographical operations and the addition of complex new technologies network efficiency & availability gain paramount importance. Experts at Ensure Services understand this need of organizations and focus on creating robust solutions, that come with high-speed connectivity. Digitspot Solutions Limited uses Networking Solutions to help our clients maximize the value of current network infrastructure by identifying risks and opportunities, analyzing network approaches, and recommending network services to optimize their network. Further, our proactive monitoring and capacity planning methodologies help our clients further decrease operational costs while increasing productivity.

Technology innovation continues to accelerate from the emergence of Artificial Intelligence (AI) to the Internet of Things (IoT), multi -cloud, 5G, ever expanding amounts of data, and increasingly complex cybersecurity threats. Innovations are changing the technology landscape at breakneck speed, creating new opportunities and risks.

D -Link is a popular brand that manufactures consumer and enterprise-grade networking hardware. D Link routers allow you to connect multiple devices to a network and manage the traffic on the network to find the shortest route between two devices that are trying to communicate with each other.

Huawei Enterprise Network is committed to making 'IP on Everything' a reality. To this end, Huawei has launched an end-to-end Intelligent Cloud-Network Solution powered by four-engine enterprise network products: AirEngine Wi-Fi 6, CloudEngine switches, NetEngine routers, and HiSecEngine network security. This solution is purpose-built for four scenarios — cloud campus network, cloud Wide Area Network (WAN), hyper-converged Data Center Network (DCN), and network security — accelerating digital transformation across industries.

At Juniper, we innovate to provide network experiences that transform how people connect, work, and live. Discover how we create solutions that power the® connections that matter most.

Infrastructure, backup, replication, and data protection solution

Digitspot Solutions Limited: Server and Data Protection solutions that ensure the delivery of proactive support services for both small scale and enterprise businesses. Focusing on industry leading solutions, our SDP provides complete Datacenter ICT solutions to meet your simple or complex business needs. We specialize in a full range of solutions which are, physical and virtual servers' deployment and support, data protection solutions consisting of recovery and replication solutions. In addition, our expertise allows us to do 'asservice' solution reducing the TCO of our client to mere OPEX cost.

IBM is a leading solution provider of some of The world's most advanced converged infrastructure featuring scale-out intelligent storage servers,

Virtualization Organizations cannot afford not to virtualize the environment if they don't want to risk having more business disruptions, more complex IT environments and unnecessarily high cost as most servers operate at less than 15 percent of capacity.

Dell EMC offers products and services across all areas of computing, networking, and storage. Solutions from EMC subsidiaries such as VMware, RSA Security, and Pivotal have enabled enterprises to innovate quickly by easily scaling, reducing costs, and improving the performance of business-critical infrastructure.

Veeam Backup & Replication is a software product developed by Veeam Software to back up, restore and replicate data on virtual machines (VMs). It was first released in 2008 and is part of the Veeam Availability Suite.

Hp core infrastructure includes servers, storage, networking, data management software, container software and analytics platforms, as well as services, all of which enable scale, performance, security, agility and economic efficiency to support any workload. compute, storage, and networking resources are abstracted from their physical allocations and can be managed by software through a web-based interface.

HYCU uniquely sees through VMs to discover where every application is running, initiates single-click backup, and automates application-specific recovery workflows. it is the only Data Protection as a Service platform that works seamlessly wherever your data sits—in hybrid environments, on-prem, multi-cloud, SaaS apps or native apps. It's data resiliency without limits.

Acronis Backup & Recovery provides enterprise-grade protection and recovery of virtual machines, containers, databases, applications (including cloud), endpoints and files. it allows you to manage backed-up data and workloads efficiently and securely, both on-premises and in any public cloud.

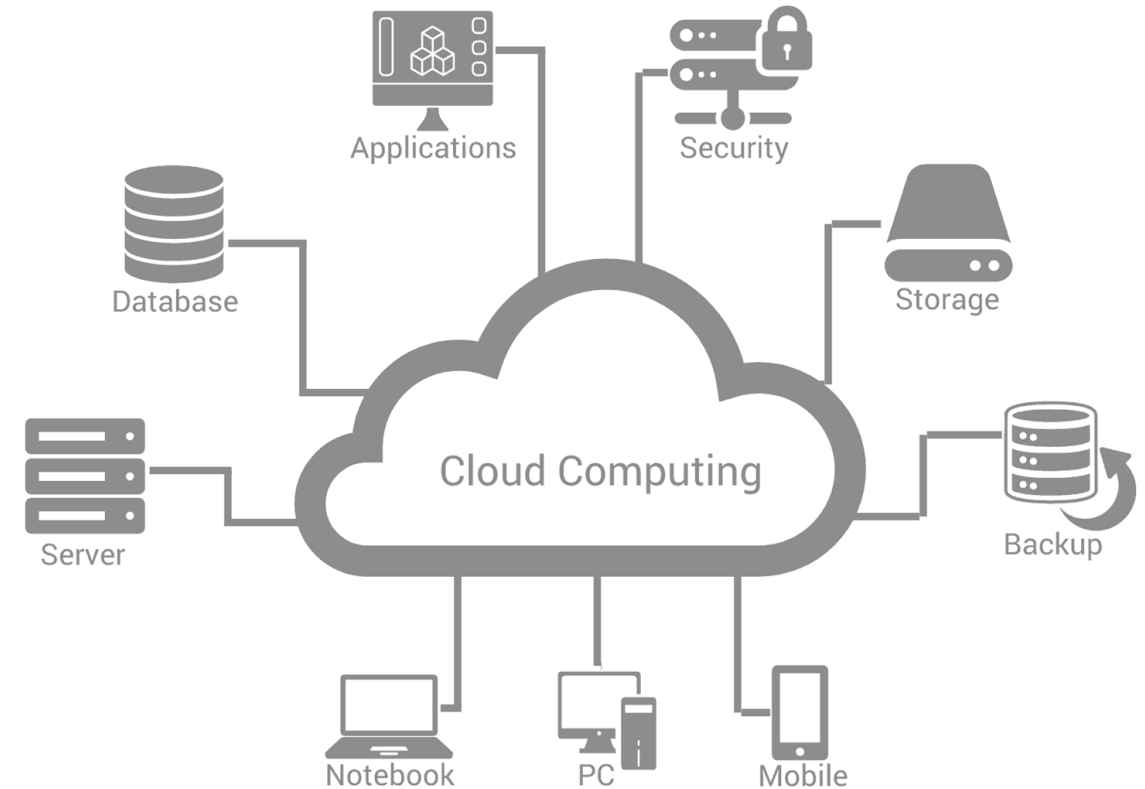

Our Cloud & IOT Products

AWS is a Cloud Services that help teams focus on the work that is most important to them quick development, deployment, and evolution of applications while trusted experts manage the infrastructure. Access cloud offerings in the AWS Hybrid Cloud Console your key to modernizing your business, reducing costs, and building with more freedom.

Our cloud platform partners provide managed services offering ranging from public, private, hybrid, and multi-cloud management services for mission-critical workloads of global organizations across all vertical and industry spectrum.

Our IT Consultancy Services

IT outsourcing can help redefine back-office operations by taking an end-to-end process view that overrides functional boundaries. This means reduced cost and increased strategic flexibility while simplifying multiple functions. Digispot Solutions Limited has the experience to help organizations bundle business processes together and include IT in a single deal to help reduce operating risk, simplify the governance process, reduce redundancies and costs, and improve overall performance. As organizations look to improve their performance, they want service providers that follow proven approaches to solve immediate business challenges and help define and deliver next-generation innovations. Digispot Solutions Limited provides clients with the right people, skills, and industry expertise to deliver management consulting, technology, and business process outsourcing services with greater reliability, quality, and productivity.

- ❖ Strategic planning
- ❖ Assessment
- ❖ Procurement
- ❖ Re-engineering solutions
- ❖ Planning best practices etc.

ISP Radio Sales and Integration

We provide individuals and organizations access to the internet and other related services. we have the equipment and the telecommunication line access required to have a point of presence on the internet for the geographic area served.

Cambium Networks is a leading global provider of wireless fabric infrastructure for business and residential broadband and Wi-Fi. We challenge fiber with wireless solutions that deliver last-mile network performance and reliability. Wireless networks must constantly evolve and operate without physical human intervention. Cambium Networks provides gigabit wireless solutions that just work.

Ubiquiti devices offer broadband connection with fast speeds. UniFi Controller is a wireless network management software solution from Ubiquiti Networks™. It allows you to manage multiple wireless networks using a web browser or a software application. The Ubiquiti portal for managing these switches is great. Very intuitive, easy to read and find settings. The switches are easy to use, configure and manage. There has been very few hardware issues with any of the ones we have deployed.

Solar and Inverter System

Solar energy has the unique characteristics of being clean, The energy source have proven to be beneficial in terms of slowing the depletion rate of fissile materials as well as supplying energy to remote rural areas without harming the environment. This power challenge has made Digispot Solutions Ltd ,strive to find a lasting solution by giving our esteemed customers renewable energy that will give them maximum satisfaction and value for their money

Genus Solar Batteries are extremely efficient, have long life, and are designed to supply power consistently and dependably. Perfect for heavy duty solar applications, it is for sure the best inverter battery that can endure tough conditions with ease.

Luminous is the leading brand of inverters and batteries in Nigeria and has consistently led the innovation and development of the industry since its launch over ten years ago. Luminous inverters are manufactured by Luminous Power Technologies, part of the \$20bn Schneider Electric Group base in India, and exclusively distributed by Wandel International, an arm of Simba Group.

Microtek inverter from Hybrid and Max+ series comes with 6 indicators on the LED display that appraises the user with various statuses and faults, if any. Continuous blinking of LED is an indicator that the system is completely charged. This is something we really liked about Microtek inverters. Additionally, there are indicators which notify the user about low battery, blown fuse, mains on and overload.

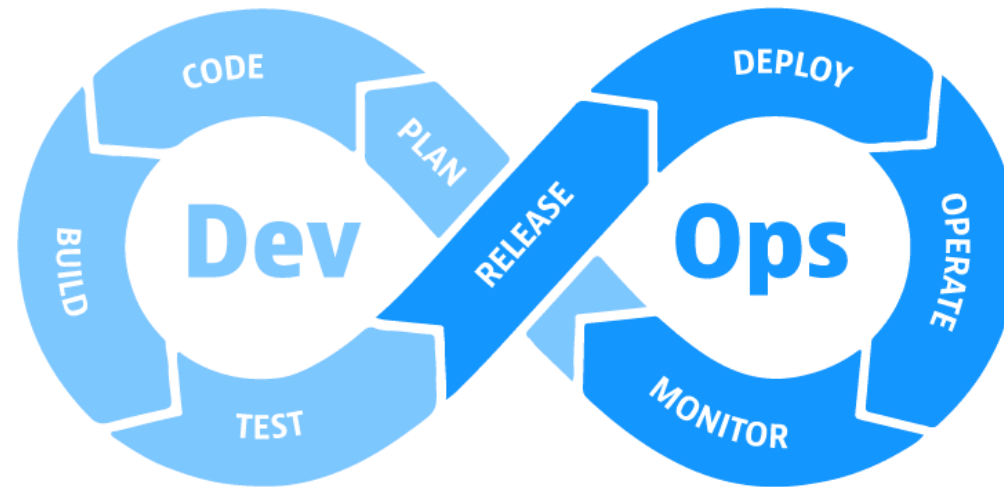

KSTAR is a leading global new energy solution provider, with an established presence in all major solar markets worldwide. KSTAR provides a comprehensive range of the latest PV inverters and energy storage systems (with CATL battery solutions) for large-scale utility, residential, commercial, and industrial new energy plants.

Our Application Dev. & DevOps Services

DIGITSPOT SOLUTION LIMITED offers scalable end-to-end application development and management solutions from requirement analysis for deployment and rollout. We hope to come to you with desired software at a reasonable cost.

DIGITSPOT SOLUTIONS LTD's services span the following application lifecycle stages;

- ❖ Application Development.
- ❖ Application Maintenance.
- ❖ Application Support.
- ❖ Application Integration/Migration/Transformation
- ❖ Application Management

The Application DevOps (development and operations) is an enterprise software development which encourages agile relationship between development and IT

operations. The goal of our DevOps services is to change and improve the relationship by advocating better communication and collaboration between these two business units.

OUR OEM PARTNERS

OUR CLIENTS

Our Value-Add

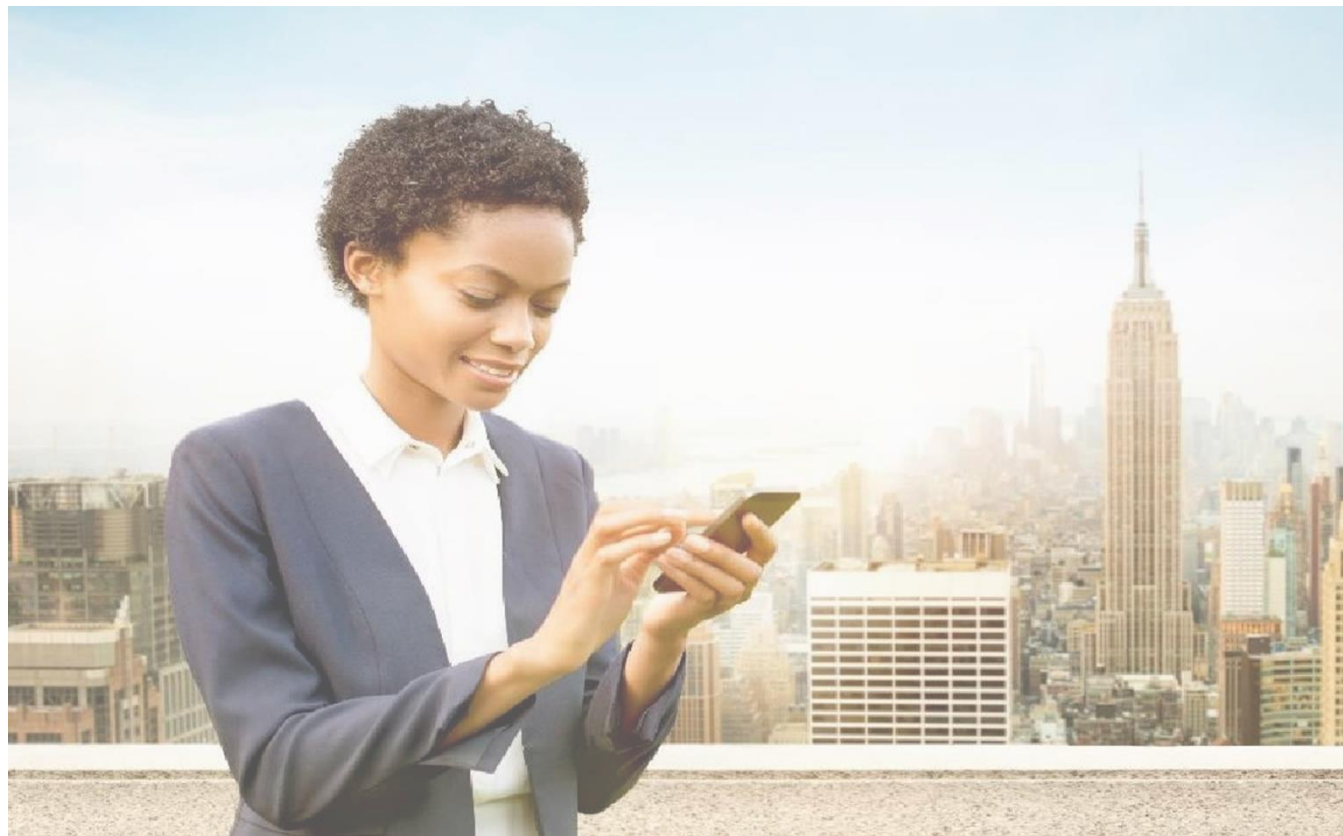

- ❖ We prioritize product excellence.
- ❖ Our industry-leading solutions, recognized by Gartner, are delivered by a highly skilled team. We provide comprehensive support, from implementation to ongoing maintenance.
- ❖ We prioritize client needs and deliver tailored solutions that drive business growth. Our experienced team and proven methodologies ensure efficient delivery.
- ❖ To safeguard your private information, we prioritize data security and follow industry guidelines.
- ❖ Our seamless marketing alignment with OEMs and distributors enables us to deliver a consistent and exceptional customer experience.
- ❖ Our business development team drives the discovery of new business opportunities and build sales pipeline.

Our Community Impact

In addition to the benefits offered by our Value-Added Reseller model, a key point lies in the support that Digitspot Solutions Limited offers in the sphere of community development.

Our association with Community development means that when you procure products & services through Digitspot Limited, you are also assisting us in contributing to the development of local communities and education where this support is most needed.

We, therefore, ask you to recognize the kind of impact that this contribution has in the broader scheme for the development of our children and the future of our country.
